Andy **PLOTKIN**, PH.D.

Presider and Conference
Organizer

About **THIS EVENT**

Join us for papers and discussions to see how largely invisible paradigms—fundamental assumptions about society and how the world operates—reinforce and prevent us from solving threatening world problems, and limit individuals and organizations from developing their intellectual, emotional, and problem-solving capabilities.

What **YOU'LL** Learn

- 01** How to use paradigms to fulfill the promise of sociology.
- 02** How paradigms can help us in solving prejudice, war, terrorism, and other societal woes.
- 03** How paradigms can help us to move toward developing a science of human behavior by integrating the knowledge within our 53 Sections.

Other **TAKEAWAYS**

- 01** An example of a syllabus for a new course in Paradigmatic Sociology. How to apply paradigmatic sociology to improve the quality of your own life.
- 02** We seek your help in answering these questions: How should we organize paradigmatic sociology as a new Section of the ASA? What kinds of articles might be published in an edited volume entitled Paradigmatic Sociology?
